

AP Chemistry Daily Videos

3.3 Solids, Liquids, and Gases

Daily Video #1

1. What are the properties of solids?
2. What are the properties of liquids?
3. What are the properties of gases?
4. Pause the video at 7:27 and attempt the problem, then evaluate how you did and identify any errors.

The box below represents a closed container with liquid ammonia, NH_3 molecules. On the box on the right, represent the same sample of ammonia after undergoing complete evaporation
